

Jaris Transportation

Editors note: Teletrac Inc. and Navman Wireless are now merged as a global telematics powerhouse. This content was created prior to the unification of both brands.

Navman Wireless fleet-management solutions help this school-bus company drive down fuel, payroll costs

Jaris Transportation's 35 vans cover an area of 150 miles, transporting special education students to and from school. The company still needed to deliver a high level of customer service, but also wanted to manage ballooning payroll and fuel costs.

Slash payroll expenses

Previously, Jaris calculated payroll using handwritten (and often inaccurate) timesheets. With Navman Wireless GPS tracking, the company knows exactly when employees start and stop work, cutting payroll costs by almost an hour per vehicle per day. Since there are two people on each vehicle—a driver who makes \$14 per hour and an aide who makes \$8 hour—that's a savings of almost \$4,000 per week fleet-wide.

Eliminate unauthorized use

Jaris realized the downside to letting drivers keep their vehicles at home was trumped-up fuel expenses caused by unauthorized use. By placing Geofences around each driver's home, Jaris is alerted any time the vehicle arrives or leaves, so unauthorized use quickly came to a halt. Instantly, Jaris realized a savings of \$7,000 per month in fuel costs alone.

Additional highlights from Navman Wireless

- Instant Real-Time Speed Alerts notify Jaris when drivers exceed speed limits while our messaging products alert drivers.

- GPS navigation pushes out turn-by-turn directions to drivers, adjusting for traffic jams and road construction.
- Activity Reports record student pick-up and drop-off times, giving parents and educators added peace of mind.
- GPS tracking and messaging capabilities ensure quick back-up in the event of vehicle breakdowns.
